

## Agenda

For the agenda and a short description of the presentations see: [WMM-I agenda](#)

## Slides

The slides of all presentations are available for the members on the online platform.

## Participants

50 people from 26 member organisations attended this first work meeting.

## Feedback from the Participants

The participants appreciated the quality of the presentations by the different speakers. During the informal gathering afterwards, it was suggested that the mix of experts from academic institutes, industry and (innovation) organisations offers an excellent networking opportunity, and an important stimulus for innovation and cooperation between the members. On the negative side it was mentioned that - due to the large number of participants - the meeting had the character of a seminar/workshop, rather than of a work meeting. We will take into account the different suggestions that we received to stimulate the interaction between the members in the following work meetings. We collected 18 evaluation sheets at the end of the work meeting. The distribution of the given feedback on particular aspects of the workmeeting is as follows:

	poor	...	...	...	excellent
Quality of the content	-	-	4	9	4
Relevance to your work	-	-	7	8	2
Timing and duration	-	1	3	11	2
Overall satisfaction	-	-	1	11	6
I would recommend this event	Yes	18	No	0	-

The following topics were most cited for discussion in the coming work meetings:

- co-existence of wireless networks.
- on-going R&D at one of the member labs.
- quality-of-service.
- sensor networks.
- long-term evolutions in wireless.
- remote monitoring.
- ZigBee.
- UWB.
- Bluetooth.

## Community status

- 29 organisations signed the membership agreement
- 60 people subscribed to the online platform

## Upcoming events

- The next work meeting of the community will be organised in September 2009.
